

# Power Supplies

Provide +5 V and  $\pm 15$  V power for the V710 chassis

SC10, SC11

## Features

- SC10 power supply provides +5 volt power for the V710 active termination panel
- SC11 power supply provides  $\pm 15$  volt power for the V710 active termination panel
- Efficient switching regulators
- Internal strap selection for operation from 115 V or 230 V, 50/60 Hz power source

## General Description

*(Product specifications and descriptions subject to change without notice.)*

The SC10 and SC11 are switching-regulator-type power supplies for the V710 active termination panel. They are packaged in 3U (5.25") high, 160 mm (6.3") deep, modules. The SC10 provides +5 volt power and is one unit wide. The SC11 provides  $\pm 15$  volt power and is two units wide. Internal straps are provided on both units to accommodate a nominal 115 V or 230 V, 50 or 60 Hz power source.

### Output Ratings:

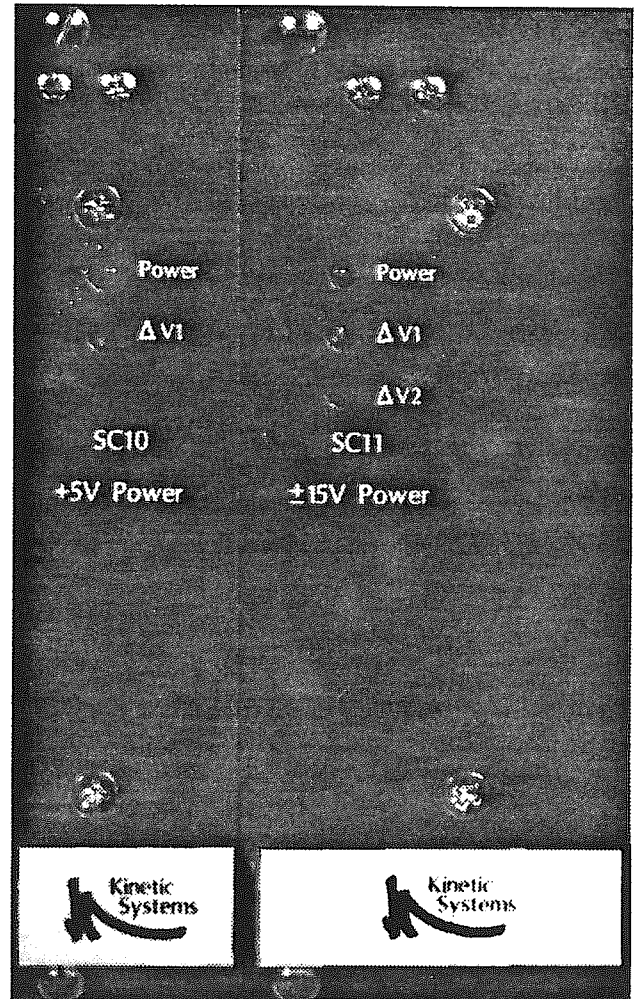

SC10	+5 V	9 A, max
SC11	+15 V	3.4 A, max
	-15 V	3.4 A, max
