

The V750 through V754 series of products are termination assemblies for VXI modules using 50- or 68-position high density connectors.

These termination assemblies plug directly onto the module front panel and provide terminals to receive field wiring.

APPLICATIONS

Field wiring terminations
Module I/O termination
General-purpose temperature measurement

V750-V754 Front-panel Termination Assemblies

Termination units that mount on the module front panel

FEATURES

- Up to 72 I/O terminations with 19" rack mounting
- Dependable cage clamp connections to field wiring
- Test points available on each terminal
- Improved CMRR option available for use in high-noise environments

GENERAL DESCRIPTION

The V750 through V754 series of products are termination assemblies for VXI modules using 50- or 68-position high density connectors.

These termination assemblies plug directly onto the module front panel and provide terminals to receive field wiring. Each terminal accepts a single solid or stranded conductor in wire sizes AWG 26 to AWG 12. Options are available with an isothermal reference that may be used when terminating thermocouples to the assemblies.

V750 shown with cover removed

ORDERING INFORMATION

MODEL	DESCRIPTION
V750-ZA11	Termination Assembly for V246
V750-ZB11	Termination Assembly for 48-channel V243
V750-ZC11	Isothermal Termination Assembly for V213
V751-ZA11	Termination Assembly for 32-channel V266
V751-ZA21	Termination Assembly for 64-channel V266
V751-ZA31	Termination Assembly for 4-20 mA V266
V751-ZA41	Termination Assembly for ± 16 V V266
V752-ZA11	Termination Assembly for V253
V752-ZB11	Termination Assembly for V252
V752-ZC11	Isothermal Termination Assembly for V253
V754-ZA11	Termination Assembly for 16-channel V285
